2019 -
present

Test Automation of Workday, SAP & ServiceNow

Prolifics Testing will be implementing our GAT Framework, which is designed to provide a cost-effective way to fast track test automation, while reducing ongoing maintenance. The framework is data-driven and componentised, overcoming problems typically associated with traditional automation frameworks. Prolifics Testing propose to implement "Day One Automation" for LBG, based on our ready-made GAT framework for UFT, and reusable library of Workday and SAP functions.

2010 -
2013

Supply of Agile Test Team for Protrade Project

Prolifics Testing supplied a number of agile test specialists with detailed business knowledge to support the test effort on the major project, Protrade.

2010

Conversion of Test Automation Assets: Silktest to QTP

Prolifics Testing consultants converted a set of existing Silk Test automated test scripts into HP Quicktest Professional (QTP) format, including a framework that can be used to easily maintain the scripts so that they are in line with the other test automation assets within the bank.

Murex Test Automation

HP QTP test automation of Murex application.

2009

MarketsLink Test Automation

Prolifics Testing designed and implemented an automated framework using HP QTP on the Lloyds MarketsLink system: Wholesale Markets Sales FX and MM RET trading platform, with the aim of creating automated test scripts for testing the RET upgrade from version 3.3 to version 3.4, and for future projects.

Testing Engagements

2004-present (cont.)

2008

e-Business Systems – Test Automation

Existing HP WinRunner automated tests were re-written in HP QTP. Scope included all 6 front-end web applications and 5 administration interfaces. A test Summit environment was also used, to enable testing of the exchange of data between the systems.

Intranet Testing – Manual Functional Validation

Prolifics Testing were brought on site for a short assignment to perform the manual testing of a new Sharepoint intranet against requirements.

2007

Summit Securities Backoffice – Test Automation

Using HP QTP, Prolifics Testing delivered an automated regression pack for the fixed income setup and trading elements of Summit, for the back office functions.

Midas Plus – Test Automation

Prolifics Testing expanded the existing QTP regression packs to include test automation.

2005

Summit Trading System – Test Automation

Prolifics Testing developed a re-usable test framework in HP QTP and Quality Center. The test automation was able to be driven via data input spreadsheets so the data can be changed for each run by business users. Once completed, test assets were handed over, with skills transfer to the in house test team and business users.

2004

e-Business Systems – Test Automation

Using HP WinRunner, Prolifics Testing consultants created a set of automated scripts to test the core functionality of the e-FX, Sales Tool, e-Loans and e-Deposits applications. Automated regression testing of the four applications was completed, with knowledge and skills transfer to the e-business support team.

Testing Framework Review and Implementation of Methodology

Prolifics Testing carried out a 'health check' of software testing process within The Treasury, making recommendations in line with industry standards. We enhanced the test process, and ran a series of presentations to all technical staff to educate and inform.

Fact Sheet

Prolifics Testing (and as e-testing before it) has worked on a diverse range of software testing engagements with Lloyds Banking Group since 2004. We are a well-established testing consultancy and on the Preferred Supplier list.

Portfolio of Services

Service

About

Benefits

Test Automation

- Open Source and proprietary tools
- Free “Accelerators” integrate with all major test management platforms

- BA360 accelerator reduced time taken for manual testing test cases by 98%
- Effecta reduced scripting time by up to 80%

Quality Fusion

- Our newest and most versatile accelerator
- Helps users accelerate the building of cloud-native apps

- Codeless test automation
- AI-generated Predictive Analytics
- Self-Healing Selenium scripts

Performance Testing

- Load, Stress and Soak Testing
- Apache JMeter specialism
- Onsite or remote

- Rigorous testing methodology
- Not tied to tool providers
- DevOps compatible

Accessibility Testing

- Mixture of manual and automated testing
- Achieve Web Content Accessibility Guidelines (WCAG) 2.1 AA compliance

- Hands-on use of assistive technologies
- Extensive reporting
- Highly affordable

Security Testing

- Framework designed to detect the OWASP Top Ten
- Specialist R&D team

- Specialist Security Testing accelerator
- Seamless integration with existing workflows
