Performance and mobile device testing help ensure products are the best they can be

AUTOMATION

Automate everyday testing functions in all testing environments

CONSULTANCY

Augment your testing teams with consultancy and test improvement services

TRAINING

Take advantage of industry-leading software testing training courses and tool workshops

A TRUSTWORTHY TESTING PARTNER

Prolifics Testing is a provider of specialist software testing services that also include training and recruitment. Our passion for testing is embedded in our culture and our staff. We develop our services and people around the ever-changing technical landscape. We care about doing things in the right way without compromising on quality.

Performance Testing

Our performance testing team designs and executes performance simulations on many application types, including web, mobile, ERP, and CRM systems. We work closely with our clients to identify bottlenecks and pinpoint issues to tune applications and improve performance.

Mobile Device Testing

Mobile app testing for native, hybrid, and web-based software. Our talented mobile app consultants have access to the latest tools and a full range of emulated and physical devices to independently test your mobile apps, functionality, UX, performance, and security.

Test Automation

Test automation of functional regression tests at the unit, system, and acceptance test levels. Our test automation specialists are experts in delivering framework-based test automation, which allows tests to be run more frequently, both in agile and traditional software development environments.

Consultancy

We provide test consultancy services for specialist engagements that include software testing health checks, agile coaching, test strategies, test process improvement, and Testing Centre of Excellence (TCoE) implementation for companies of all sizes across a wide range of industry verticals.

Testing-as-a-Service

Outsource software testing to the specialists. Our proven consultancy team takes on individual projects or larger programmes of work. Testing can be run from client premises, our UK offices, or in a combination. Test phases covered include mobile, functional automation, performance, and security.

Software Testing Health Check

Our Software Testing Health Check examines the effectiveness of your test process through audits and assessments of current test practices. We help ensure that your projects are delivered on time, with confidence.

Tools

Working with our technology partners, we offer leading-edge software testing solutions from the likes of HP, Oracle, SOASTA, Borland, and Radview. We are also experts with popular open-source testing solutions such as Selenium and JMeter.

Training

We develop and deliver industry-leading software testing training courses and tool workshops. Fully accredited by the BCS, ISTQB, and iSQI, our courses are available UK-wide on a public schedule, or privately on demand.

Clients

We have extensive experience working with a range of organisations across a multitude of architectures.

Recruitment

Our dedicated recruitment team responsible for recruiting software testers. Our recruiters are experienced and certified in software testing, some to the practitioner level, creating a significant advantage over traditional recruiters.

Get Started With Prolifics' Testing Services

Contact us at info@prolifics-testing.com to learn more about our offerings or to sign up for your testing, automation, consultancy, or training sessions.

OUR COMPANY

Prolifics Testing is a specialist IT consultancy with a total focus in software testing - automation, performance, consultancy and training.

We deliver high quality, flexible software QA and testing services - supporting our clients with outsourced testing on demand, digital transformation, business as usual and specialist testing disciplines.
