

SOLUTION BRIEF
ORACLE SYSTEMS AND MIGRATION

ORACLE E-BUSINESS SUITE & ORACLE FUSION TESTING

WHAT WE OFFER

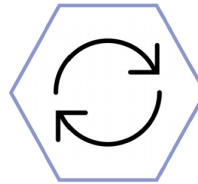

EXPERIENCE

Over seven years of experience with Oracle EBS and Oracle Fusion testing

RESOURCES

Over 50 Test Consultants with Oracle EBS and Oracle Fusion testing experience

FAST TRACK AUTOMATION

Accelerators & library of re-useable functions built specifically for Oracle EBS

MIGRATION EXPERTS

Prolifics Testing has helped clients successfully migrate systems for over 18 years

TYPES OF TESTING SERVICES

· BA360

BA360 accelerates the manual testing process by using automated Machine Learning and Predictive Analytics to generate test cases automatically.

Using Machine Learning, BA360 created 1,500 manual test cases for Oracle EBS in four-man days vs 187 man days it would have taken to do manually.

· EFFECTA

Effecta is the in-house test management and automation accelerator suite that makes code- and script-free test automation possible. It reduces scripting time by up to 80% when compared to tools such as Selenium-based frameworks or UFT.

Prolifics Testing have created over 1,000 automated test scripts for Oracle EBS and over 120 prebuilt EBS controls, reducing automation effort and costs for EBS by 60%.

· PERFORMANCE TESTING

The Performance Test Accelerator is designed to streamline performance testing for load, soak and stress tests.

Prolifics Testing has undertaken over 30 performance test engagements for Oracle EBS.

· MOBILE TESTING

For mobile compatibility tests, Prolifics Testing uses Sauce Labs for cloud-based virtual testing on web browsers, mobile emulators, and simulators.

Their UK Test Lab also holds an extensive and regularly refreshed array of physical devices of all major manufacturers and operating systems to run manual or automated mobile compatibility tests.

EXPERIENCE

Prolifics Testing gained considerable experience with Oracle EBS and Oracle Fusion testing experience at VMWare, where it undertook Manual Functional, API, Automated and Performance Testing.
