CENTRALISED MODEL

Optimise and control testing across departments

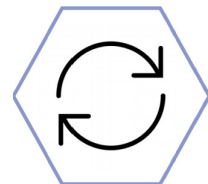

BEST PRACTICES

Underpin methodology to create a fundamentally sound approach

EXPERIENCE IN SCALE

Stable, long-term relationships with major global clients

BLENDED APPROACH

Efficiency and cost savings through onshore/offshore leverage

CHART YOUR ROUTE TO SUCCESS

With an increase in the number of projects growing across enterprises today, success lies in your organisation's ability to identify and overcome certain obstacles, ranging from legacy systems and complex IT environments to regulatory and compliance mandates.

As this pressure builds, the importance of comprehensive testing remains clearer than ever - particularly the ability to test at faster rates and reduced cost.

Prolifics Testing knows that bringing together independence, innovation, and domain knowledge helps organisations eliminate quality and operational challenges. We work closely with you to establish a centralised and comprehensive Test Centre of Excellence, allowing you to move beyond the obstacles faced by quality assurance teams and drive standardisation across your projects.

Introducing the Prolifics Test Centre of Excellence

A Test Centre of Excellence provides a centralised testing model that brings together people, processes, tools, domain knowledge and best practices, allowing you to optimise and control tests spread across different departments.

This flexible framework helps to govern how your testing team engages and delivers highly efficient testing services while eliminating the common challenges associated with testing, including the use of multiple tools, the lack of standardisation, and the inconsistency in delivery. With a Test Centre of Excellence, Prolifics Testing enables you to identify process gaps, define an improvement roadmap, and deploy appropriate testing tools, all while providing a global team of test consultants to streamline costs.

Our status as an experienced and independent testing provider brings you:

- Centralised test capability with defined scope, price and success criteria
- A combination of testing services
- A central team of experts to drive standardisation of processes, procedures, and tools
- Access to industry-leading testing experts across the globe
- A partnership approach that helps to transform enterprisewide testing practices

Supported by Best Practices

Prolifics Testing' methodology is underpinned by a host of best practices, helping create a fundamentally sound approach.

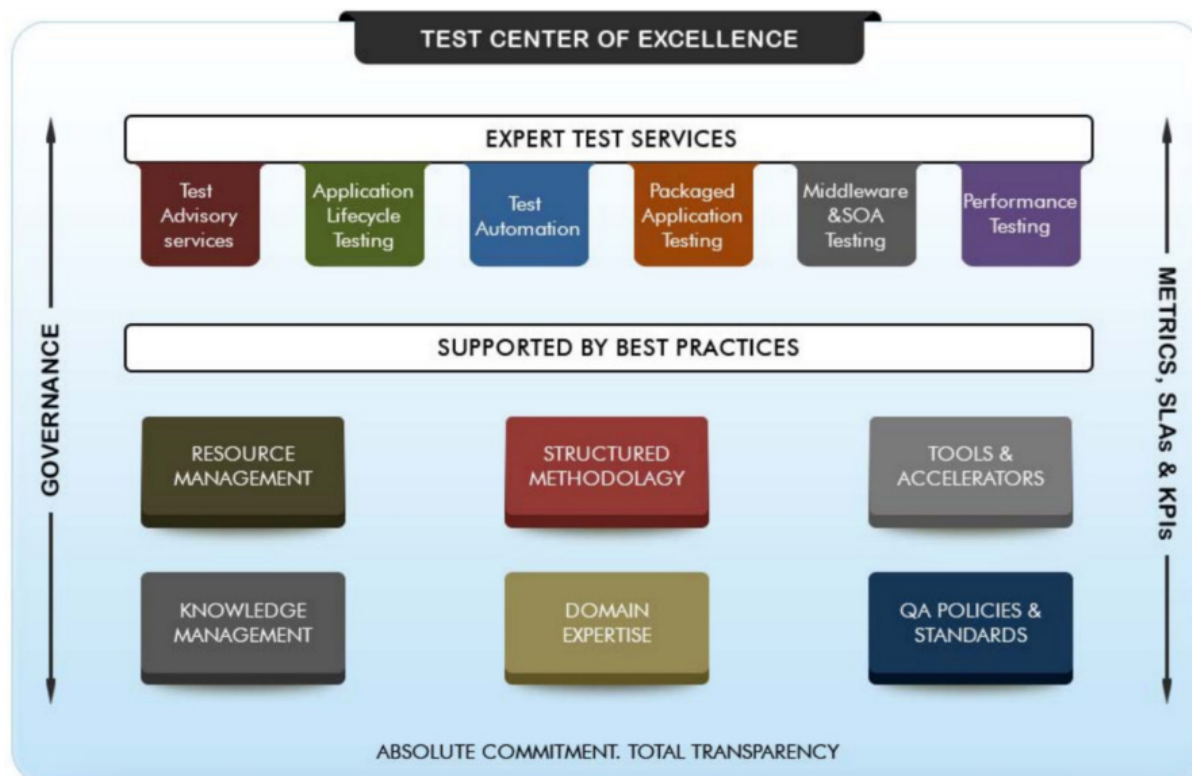

Figure 1. Prolifics Testing' Test Centre of Excellence blends expert-level test services and a range of best practices, helping your enterprise build the best possible testing environment.

- **Resource Management.** A team of 1,100+ highly trained and experienced resources follows established resource management policies
- **Structured Methodology.** Proven test frameworks and methodologies span development scenarios
- **Tools & Accelerators.** Our skilled professionals are adept at deploying industry standard tools alongside our proprietary test automation and data validation solution
- **Knowledge Management.** A robust end-to-end knowledge management process covering all aspects from assessing to transferring knowledge
- **Domain Expertise.** We leverage extensive experience in applying testing techniques across a wide variety of applications, industries and processes
- **QA Policies & Standards.** A set of guiding principles and standards that ensure effectiveness in the testing process and overall software reliability

Your Trusted Testing Partner

Even if your needs are growing, and we are committed to helping you succeed.

Prolifics services organisations across the globe, and maintains stable, long-term relationships with Fortune 500 and Global 2000 clients. Our testing specialists are among the top skilled test professionals, leveraging extensive knowledge and experience together with unique engagement models, industry best practices, proven technology accelerators and a customised blended shore delivery model, all designed to fit your specific business needs and IT landscape. Let Prolifics help you make the most of your investment today.

End-to-End Test Automation with Effecta

- Automates test cases within an easy interface
- Brings the power of data validation to the field level
- Accelerates testing with scriptless automation
- Extends HP and other industry test tools
- Test automation for custom, ER, and off-the-shelf applications
- Provides pre-configured components for SAP testing

“Effecta was key in delivering our testing solution, which has helped Pacific Coast improve the quality and reliability of our SAP environment while reducing our testing costs and effort.”

—Anton Karnaukhov

Director of Information Systems Pacific Coast Companies

We offer a customisable, industry-standard framework, leveraged across a broad portfolio of business applications and technologies.

- Our proven test methodologies and processes have been refined through numerous engagements, bringing you a higher maturity of test processes
- We use relevant toolsets including our proprietary accelerators to improve test capabilities as well as time to market
- We provide the highest quality of project management with real-time visibility, bringing you enhanced measurement and reporting
- We provide capability, flexibility and scalability to extend your test team and support your needs both onsite and offshore
- Our flexible, adaptable and cost-effective delivery model utilises a blended shore approach to scale on demand, resulting in cost savings through efficiencies and offshore leverage
